System upgrade promises an enhanced experience for HUECU's online and mobile banking users.

HUECU's electronic banking interface is getting a makeover. This summer, we will introduce a more streamlined banking experience that is consistent across both *desktop and mobile platforms.*

The Unified User Experience (UUX) also touts modern design and a cleaner look to make online features more accessible than ever. Upgraded homepage usability will empower users to find their most commonly used transactions instantly, and an improved search function helps call up important data on demand.

The updated mobile app will be launched at the end of June and will require users to download the new version from the website at their next login. The updated desktop experience will follow in July. However, users will have the option to activate it right away or any time before the end of the year, when all remaining users will be automatically migrated.

There is no need to re-enroll and your login credentials will not change. Stay tuned for more information about this exciting upgrade to the online and mobile banking experience!
